Docket No.: 56647US002

Version With Markings to Show Changes Made

- 1. (Amended) An article [repositionable label] comprising:
 - (a) a backing having two major surfaces, [and]
- (b) a layer of repositionable non-pressure sensitive adhesive comprising a thermoplastic block copolymer elastomer coated onto at least one major surface of the backing, wherein the adhesive has a storage modulus at room temperature greater than $3x10^5$ Pascals[.] and;
- (c) an optical recording medium having a first major surface and a second major surface opposite the first major surface, the first major surface disposed against the layer of repositionable non-pressure sensitive adhesive.
- 2. (Amended) The <u>article</u>[repositionable label] according to claim 1 wherein the block copolymer [has]comprises polystyrene block.
- 3. (Amended) The <u>article</u>[repositionable label] according to claim 2 wherein the block copolymer [has] <u>comprises</u> 10% to 30% <u>of poly</u>styrene block.
- 4. (Amended) The <u>article</u>[repositionable label] according to claim 1 wherein the adhesion of the repositionable non-pressure sensitive adhesive is greater than 3 oz/inch on <u>the first major</u>[a targeted] surface of the optical recording medium and is less than 3 oz/inch on <u>skin and paper</u>[an undesired surface].
- 5. (Amended) The <u>article</u>[repositionable label] according to claim 4 wherein the adhesion to the <u>first major surface</u>[targeted surfaces] is in the range 5 40 ounce/inch.
- 6. (Amended) The <u>article</u>[repositionable label] according to claim 5 wherein [the targeted surfaces include but are not limited to]<u>material forming the first major surface of the optical recording medium is selected from the group consisting of: polycarbonate, polyvinyl chloride, polyester, [or] <u>and</u> glass.</u>

USSN: 09/849,147 Docket No.: 56647US002

7. (Amended) The <u>article</u>[repositionable label] according to claim 6 wherein the [target surface] <u>first major surface of the optical recording medium</u> is [the surface of] <u>a non-reading side of [an] the optical recording medium[a].</u>

- 8. (Amended) The <u>article</u>[repositionable label] according to claim 1 wherein the backing is [a] <u>selected from the group consisting of:</u> polyester film, polyolefin film, paper, coated paper, metallized film, foil, non-wovens and cardstock.
- 10. (Amended) The <u>article</u>[repositionable label] according to claim [4] 1 wherein the adhesive has an adhesion range of 3 to 40 oz/inch when adhered to the [non-read/write] <u>first</u> major surface of [an] <u>the</u> optical recording medium and an adhesion of less than 8 oz/inch when adhered to standard white paper having a standard weight of 20/50 lbs.
- 11. (Amended) The <u>article</u>[repositionable label] according to claim 1 [4] wherein the adhesion range on <u>the first major</u> [a disc] surface is <u>about 5[-] to about 10 oz/inch and the</u> [preferred] adhesion range on paper and skin is less than <u>about 1 oz/inch</u>.
 - 20. (New) The article according to claim 1 and further comprising: an ink receptive coating on one major surface of the backing.
